Warning

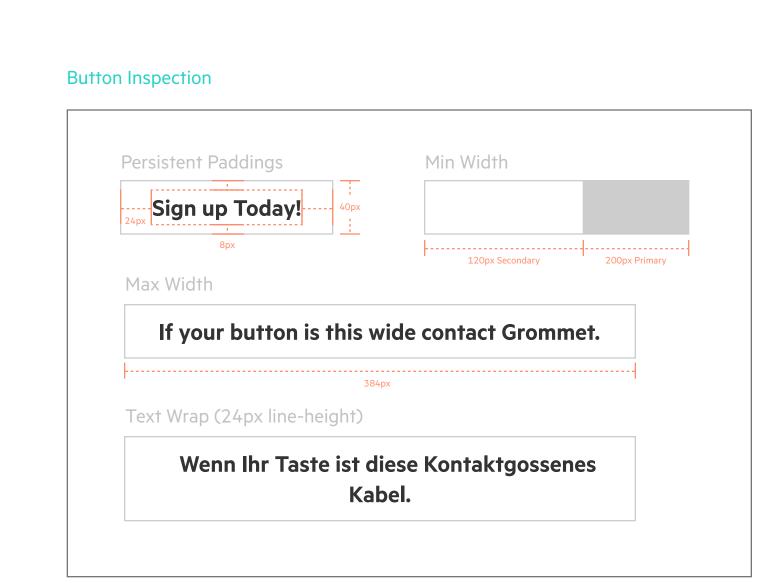

BUTTONS

Buttons are commonly used to direct users to key actions in an experience.

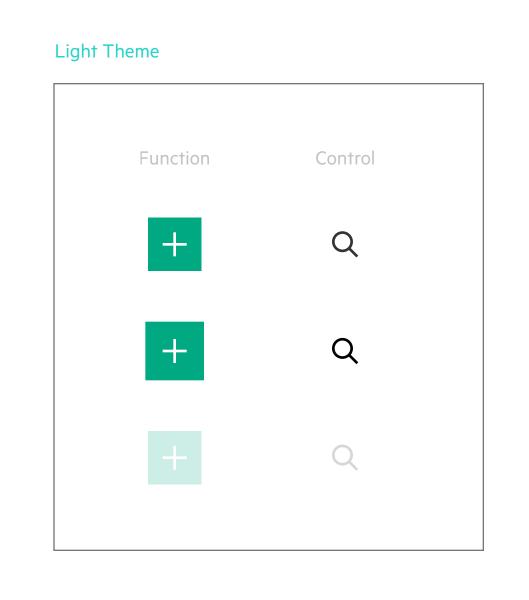

Background

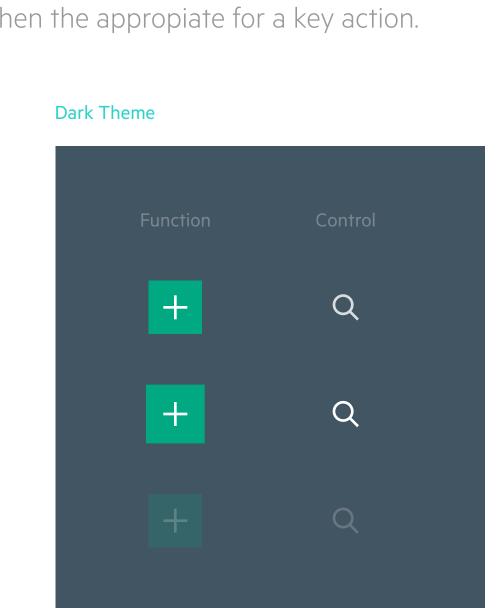

ICON BUTTONS

Icons can be used in a button context when the appropiate for a key action.

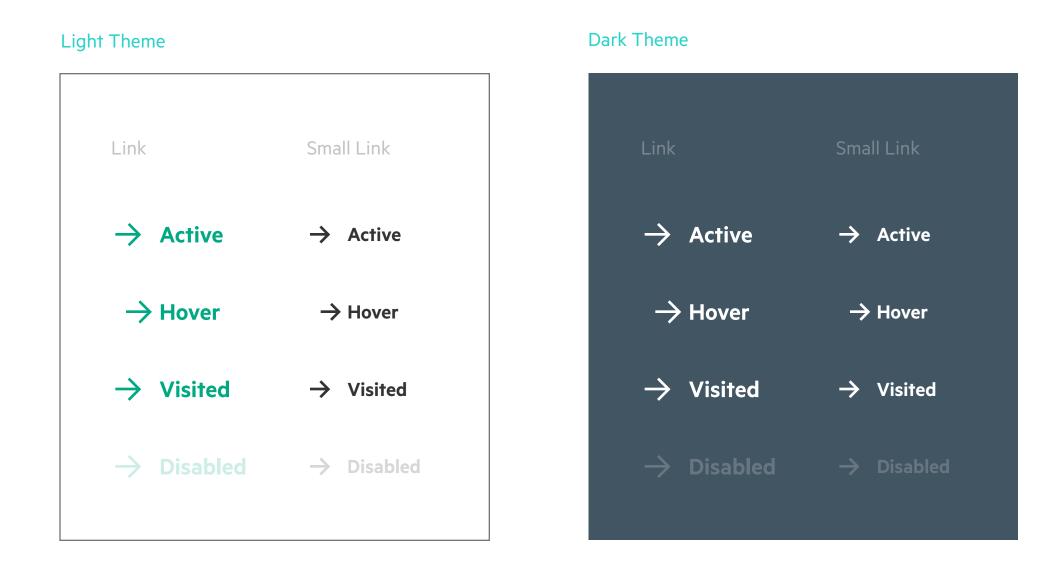

Light Navigation

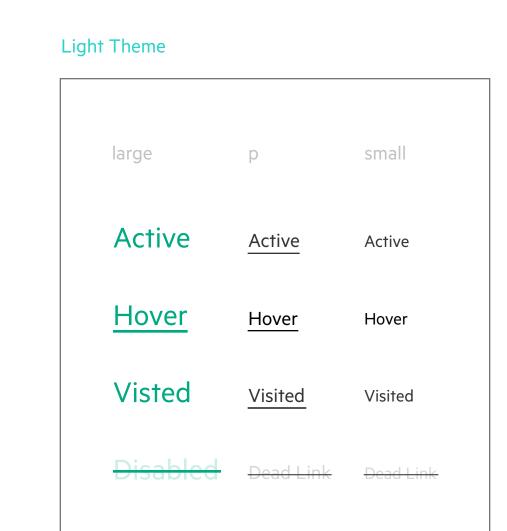

TEXT LINKS

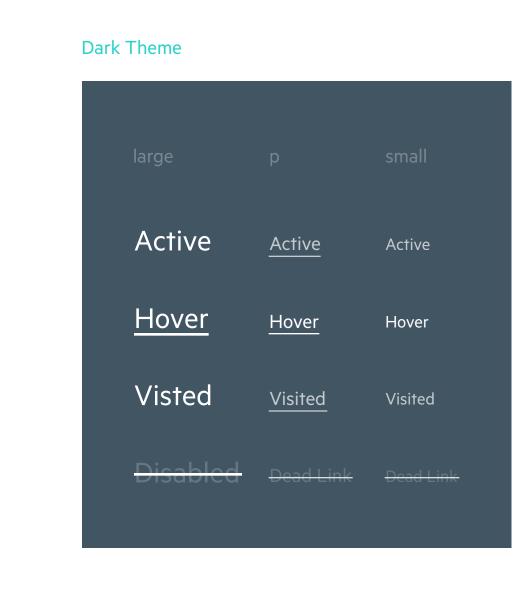

Text links are used as a secondary level of importance after buttons.

PARAGRAPH TEXT LINKS

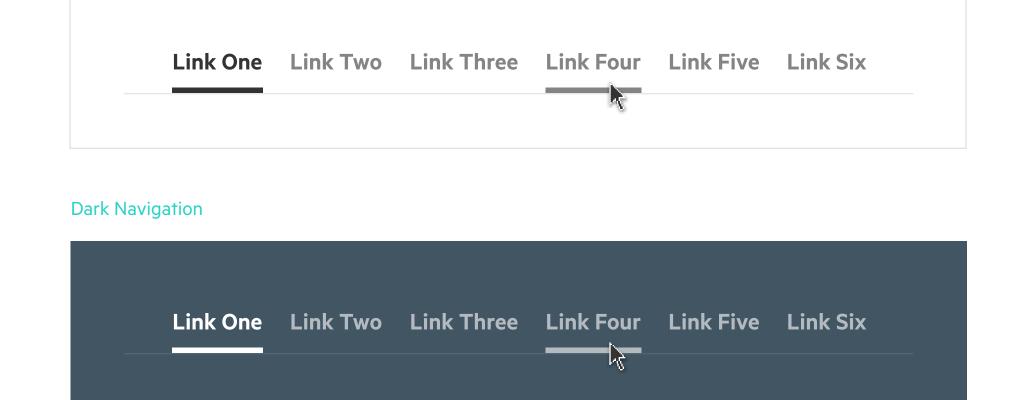

Grommet provides text styling for links used as inline paragraph elements.

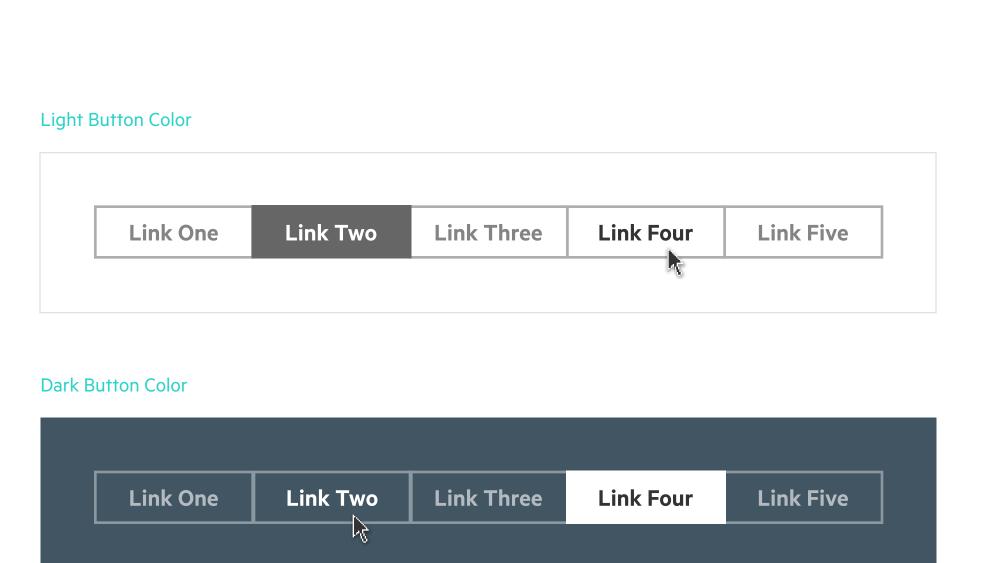

TABS / SUB-NAVIGATION

When looking at complex data, Tabs can be useful for disseminating the content.

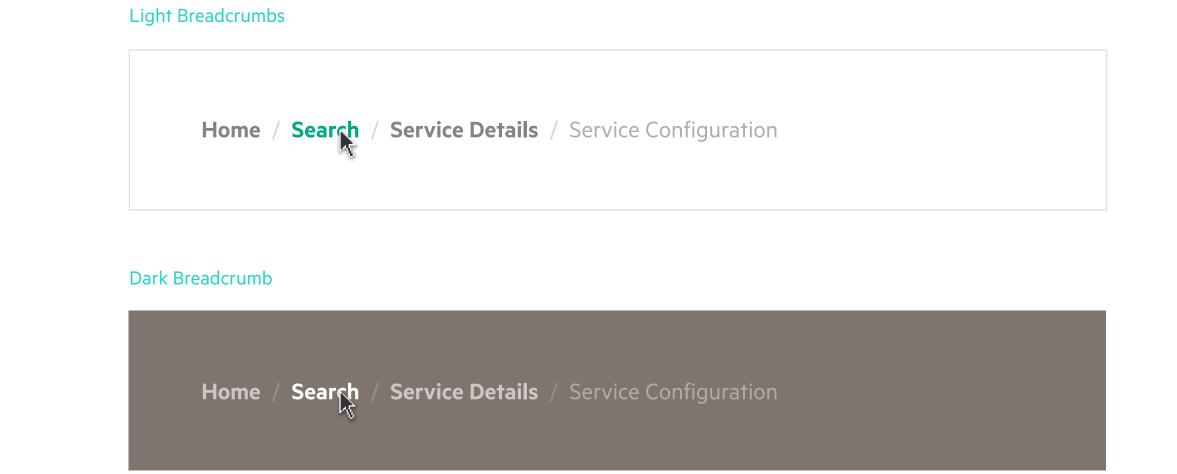

HORIZ BUTTON GROUP

Button Groups are useful quick glance content that is interrelated.

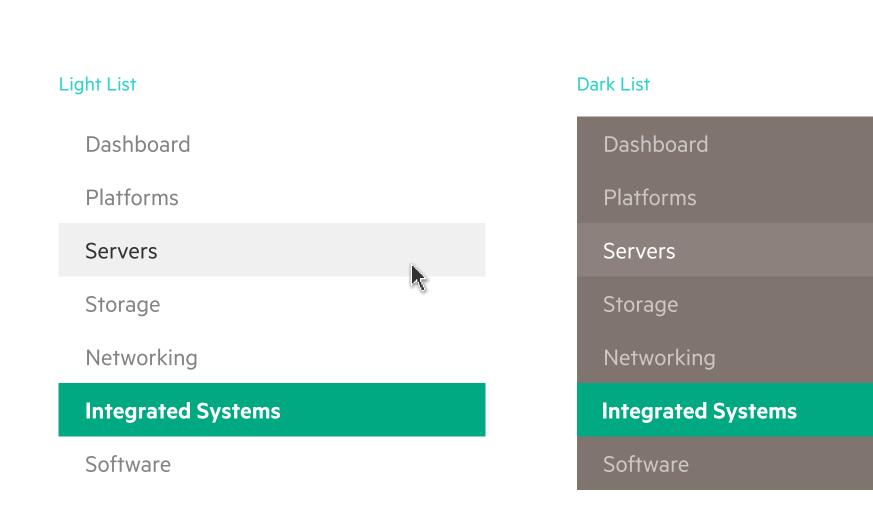

BREADCRUMBS

Breadcrumbs are used to provide context and shortcuts to users when diving into application and web content.

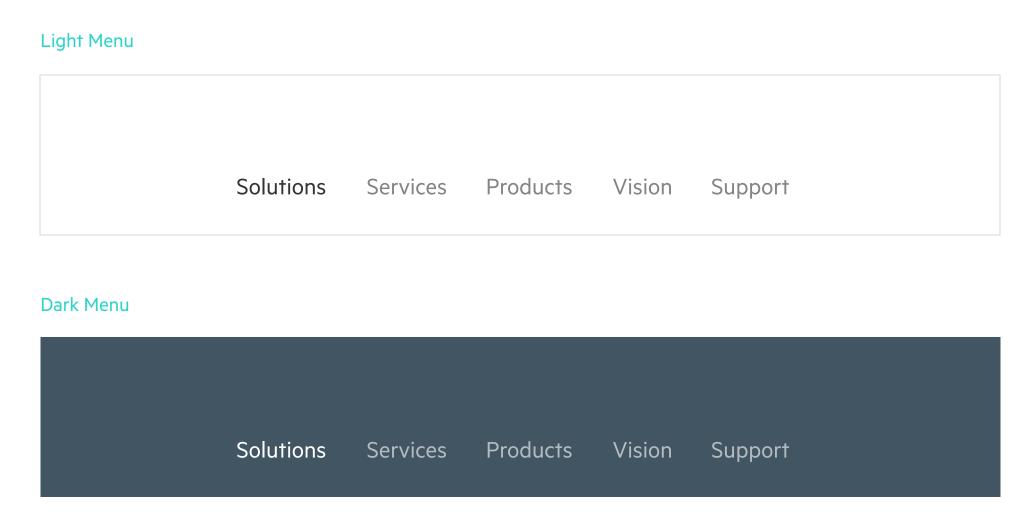

VERTICAL LIST MENU

Vertical List Buttons are used for primary navigation.

HORIZONTAL LIST MENU

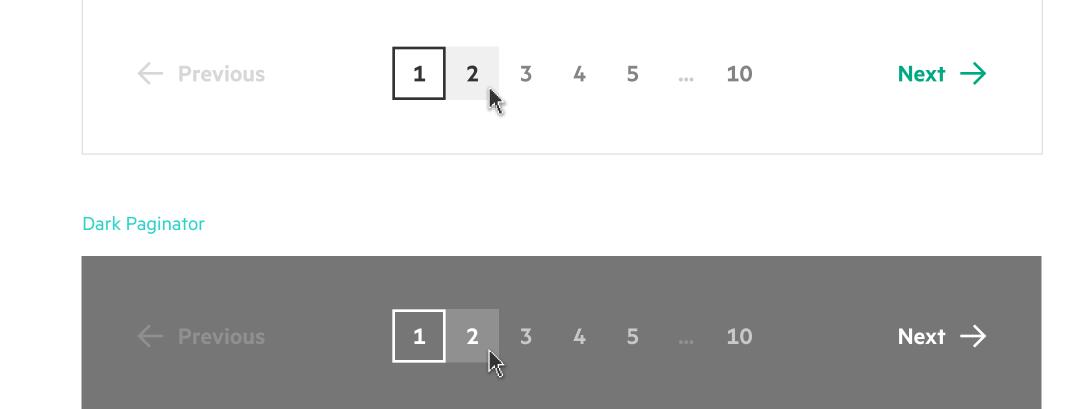

The horizontal list menu is used as primary navigation element when a universal search experience is not warranted.

PAGINATION

Light Paginator

The paginator is one of the ways employeed to skip through large datasets. Another form of pagination used is infinite scroll, see application patterns.

ICONBAR

When appropiate, an Iconbar can be used as an alternative to Vertical List on small screen sizes and mobile.

Simple Footer, Dark Theme

Home About Terms Privacy

TOOLBAR

When editing rich text for web contnet or applications, the Toolbar provides an extensible set of actions contained in a slim bar.

Fucntional icons are used to highlight core actions, visually express common controls, and provide context within web content and applications. Control icons have a larger hit area around them to work well on mobile platforms. To see the full set of icons visit, www.hpe.com/design/resources/icons

STATUSICONS

Status icons come in multiple sizes for use in different contexts. They are differentiated both by color and by shape for accessibility.
